## LuxaCrown

Defining the long-term provisional crown and bridge solution

# Reliable. Durable. Versatile.

## HIGH-PERFORMANCE & FAST

LuxaCrown is the revolutionary **long-term crown and bridge provisional material with** outstanding stability, durability and reliability that's bridged the between simple temporary provisionals and permanent dental prostheses.

## RELIABLY STABLE & DURABLE

LuxaCrown has exceptional fracture toughness of  $> 2 \text{ MPa} \cdot \text{m}^{0.5}$  ensuring **stable restorations**. \*Data on file. In vitro studies for LuxaCrown that measured wear, color stability, flexural strength, fracture toughness, and polishability LuxaCrown yielded outstanding results, proving the material's stability and long-term application.

## OPTIMUM VERSATILITY

LuxaCrown gives the remaining tooth long-term protection, to restore anatomical form, masticatory function, and for esthetic corrections. It's ideal for complex restorations and **long-term monitoring of treatment success** during healing stages.

# Exceptional efficiency and affordability

Now you can instantly increase patient acceptance and practice revenue without compromising quality. This affordable, long-lasting option provides a new opportunity for patients to receive premium care.

## THE LUXACROWN ESTHETIC SHADE SYSTEM

Producing up to 36 single crowns or up to 24 three-unit bridges in a single cartridge.
