ONE MINUTE PRODUCT MEETING

Ecosite Bulk Fill & Ecosite Bond

Designed to deliver superior esthetics with one quick 20-second light cure and single-layer application, Ecosite Bulk Fill is the new generation of bulk fill composites for all your posterior restorations. It delivers unrivaled handling, packability and polishability with superb adaptation to the depth of 5mm without sticking to instruments. Plus, the advanced nanosubmicron technology allows for low shrinkage stress and a high gloss finish for outstanding natural-looking esthetics, while releasing fluoride. Ecosite Bulk Fill is available in two-esthetic all-purpose shades, universal and light, and contrast shade, and in convenient dispensing syringes and safetips.

Ecosite Bond is a light-cured, 1-bottle universal bonding agent with optimal bond strength. Now, you can have freedom with your etching mode!

FEATURES & BENEFITS

- › Quick, 20-second light cure
- › Excellent adaptation, packability and handling
- › High polishability for superior esthetics
- › Low shrinkage stress
- › Does not stick to instruments
